WEBDOLLAR

Simplicity

WebDollar (WEBD) is a cryptocurrency fully native to the World Wide Web, built around the concepts of simplicity, lightness and portability.

In order to encourage the mainstream adoption of crypto-currency, we need to address all kinds of users. For that, we've created the simplest possible user experience for a cryptocurrency.

CPU Friendly Mining

- CPU mining
- ASIC resistant
- GPU unfriendly

Extremely Easy To Use

Just visit WebDollar.io and you can start mining directly on the site, from any device, almost immediately.
- No Installations
- No Downloads
- No account creation or complicated configurations.
- Wallet is safely created automatically and stored locally

Referral System

Referral system gives the possibility for miners with less hashing power to have the same revenue of a miner with higher hashing power. You can create a referral link for joining the pool you are mining in, the miners who joined the mining pool with the link will share a small percentage of their revenue with you.

Symbol:
WEBD

Total supply:
42,000,000,000
(42 Billion) WEBD

Smallest subunit:
0.0001 WEBD

Block time:
40 seconds

Block reward:
halving every 3,153,600 blocks
(4 years)

Initial block reward:
6000 WEBD

**Difficulty:**
retargets every 10 blocks

Mining Pools:
Available

Mining Algorithm:
Argon2d

Consensus:
NiPoPoW

Road Map

Fastest Development of a Browser-Based Cryptocurrency

Q4 2017 — WHITE PAPER DRAFT
Initial white paper was realized to describe the WebDollar protocol.

Q4 2017 — TECH HUB JS HACKATHON
Initial team was formed during the JSHacks Blockchain Hackaton to bootstrap and implement the vision behind WebDollar.

Q4 2017 — P2P AND MINI-BLOCKCHAIN
Our community started to develop and finalize P2P connections through Websockets and WebRTC. Implementation of Mini-blockchain.

Q3 2018 — MINING POOLS & REFERRAL SYSTEM
Developing a easy way to mine with your friends in social mining. Also, creation of the Mining Pools Referral System.

Q2 2018 — SECURITY & LAUNCH MAIN NET
Non-Interactive Proofs of Proof-of-Work, Improving the Security and launching a Main Net.

Q1 2018 — BUILT IN BOUNTY PROGRAM
Development of a bounty program that helped evangelists to spread the word of Webdollar worldwide.

Q1 2018 — LAUNCH TEST NET
Developing consensus of the Proof of Work and blockchain launching.

Q3 2018 — EXCHANGE LISTING
Developing the first Exchange for the WebDollar Ecosystem and creating easy to integrate API for other Exchanges.

Q4 2018 — EVANGELISM & MARKETING
Growing the community, running bounties programs & attend to cryptocurrency confereces.

Q4 2018 — OFFLINE TRANSACTIONS
Allowing users to add a new optional security layer by signing offline transactions using their wallets on desktop or mobile app.

Q1 2019 — ANONYMITY & MULTISIGN
Developing Anonymity and researching multisign with fingerprint/faceID.

Q4 2020 — SCALING TRANSACTIONS
Improving the max number of transactions per second accepted by the WebDollar Protocol.

Q4 2019 — DECENTRALIZED BAZZAR
Creation of a decentralized Bazaar where people can buy or sell goods using Webdollar as a payment method.

Q2 2019 — SMART CONTRACTS
Developing a Smart Contracts Platform that allows users to create their own financial assets — Webdollar Tokens.

Q2 2019 — VOTING COMMUNITY CENTER
Voting center for community where features and updates are proposed to be upvote or downvote by our holders.

Q1 2019 — REAL TIME ROAD MAP
Developing a Real time road map with the status of all apps developed by our devs and community.

Discover the Pools

The Pool leader will set the Pool Leader fee, Host fee and Refferal fee.

Host 1
